Dealer Notification of Seat Belt Recall

AM-Safe Commercial Products of Elkhart Indiana has issued a recall of several lots of center push button buckles that were manufactured in December 1999 and early January 2000.

Taylor-Dunn's supplier of AM-Safe's seat belt part number 60-02 with buckle lot number 0001 with label lot number 0200 has informed Taylor-Dunn that shipments delivered to Taylor-Dunn were not affected by this recall. An inspection of stock on hand at Taylor-Dunn has verified the absence of this lot number.

Based on the notification of the manufacture and the information of our supplier, Taylor-Dunn is confident that products manufactured or sold by Taylor-Dunn are not affected by the recall.

In the interest of public safety and dealer support, Taylor-Dunn feels that we should notify our dealer network of this recall in the event that seat belts purchased from other sources and installed on Taylor-Dunn products by dealers as after market accessories may be affected by the recall. This recall also involves several part numbers not used on Taylor-Dunn products that may be used on other products sold by our dealers.
